

# “Stem Cells: Development & Management”

Theme “Stem Cells: Development & Management”

When November 30 – December 2, 2015

Where Naresuan University, Phitsanulok, Thailand

Call for papers

- Topic “Stem Cells: Biology & Technology”
- Topic “Stem Cells: Applications”
- Topic “Stem Cells: Management”

## About the Conference

An international conference on “Stem Cells: Development & Management,” organized by Naresuan University on the occasion of the 25th anniversary of the university, will be held from November 30<sup>th</sup> to December 2<sup>nd</sup>. The goal of this conference is to fill the prevailing gaps in the transformation of this science of hope to serve all in need. In Thailand, there are over 100 organizations, including universities dealing with cell biology and stem cell research which offer promising research related to cell science and stem cells. At Naresuan University, there are Centers of Excellence in many fields, including the Center of Excellence for Medical Biotechnology (CEMB) where an effective research team on development, regeneration, and stem cell biology takes an interdisciplinary approach to understanding the fundamental question of how a single cell ultimately produces a complex fully patterned adult organism, as well as the related question of how adult structures regenerate. There are still many challenges in this vibrant research field, including ethical questions relating to raw materials and clinical trials which in turn affect the ability to transfer research results into stem cell approved therapies.

The special lectures from our distinguished keynote speakers will review the recent research and breakthroughs in stem cell biology, technology, applications and management, the current understanding of cell plasticity in cancer, and the scope of other recent advancements. The conference will be a great platform for researchers to share their current findings in this field of foundation science. The major scientific sessions in the conference will focus on the latest and exciting innovations in prominent areas of stem cell research, which would also educate the attendees from different research backgrounds and provide a platform for the discussions between academia and business.

## CONFERENCE HIGHLIGHTS

- Distinguished keynote speakers for “Stem Cells: Development & Management”
- Oral and poster presentations in
  - Stem Cell Biology & Technology
  - Stem Cell Applications
  - Stem Cell Management
- Panel discussion on “Stem Cells: Development & Management”

## Important Dates

- Abstract/Full Paper Submission Deadline: September 1, 2015
- Notification for Acceptance: October 1, 2015
- Deadline for Early Registration: October 1, 2015

Registration Fee	US \$250
Early Bird	US \$200
Student	US \$150

## Publication:

All accepted papers in this conference are planned to be published in international journals (indexed in ISI web of Science) and Naresuan University has a policy to financially support all of the papers from this conference accepted by the journals.
